VERTEX

PROCESS SOLUTIONS

Mechanical & Structural Equipment | Process Technologies | Commissioning & Field Services

CAPABILITY STATEMENT

PERTH, WESTERN AUSTRALIA

WHO WE ARE

Vertex Process Solutions provides high-quality equipment for the mining, minerals processing, and heavy industrial sectors. Our directors bring 40+ years experience executing multi-million dollar contracts including rotating mechanical equipment, air displacement systems and process & instrumentation packages. We understand the technical and the commercial demands of complex capital projects and pride ourselves on delivering the right solution at the right time.

CORE CAPABILITIES

- Design, fabrication, installation and commissioning
- Bulk materials handling (stackers & conveyors)
- Rotating mechanical systems (pumps & compressors)
- Process and instrumentation packages (valves & instrumentation)
- Tight timeframes, complex logistics
- Spares and maintenance

DELIVERY & SUPPORT

- Alliances with established workshops across the Perth metro area for fabrication and machining
- Commissioning and service team available for on-site call-out
- Rapid mobilisation for breakdown and shutdown support
- Direct execution or alliance-partner workshops as scope demands

TRACK RECORD

40 years of combined director-level experience executing multi-million euro mechanical and structural contracts internationally, spanning rotating equipment, air displacement, and process & instrumentation scopes.

SAFETY & QUALITY

Committed to industry-standard HSE and quality management practices on every site. All equipment is built to meet project conditions and to comply with Australian Standards.

INDUSTRIES SERVED

Mining & minerals processing | Oil & gas | Heavy industrial
