

WHO WE ARE

Experienced people | Practical support.

Built on more than 30 years of practical industry experience, SPR combines extensive operational knowledge with contemporary safety management practices, training methodologies and regulatory requirements.

Our experience spans mining operations, mobile crushing and screening, mineral processing, civil earthworks, mobile equipment operations, maintenance, supervision, training and workplace safety.

Our approach is straightforward: provide practical, reliable and commercially sustainable solutions that support our clients' operational objectives while maintaining a strong commitment to workplace safety and workforce development.

OUR POINT OF DIFFERENCE

Operational understanding • Clear, workable documentation • Flexible site coverage • Training and competency support • Client-focused delivery

PROVEN EXPERIENCE.

SAFER WORKPLACES

Mining | Civil Construction | Processing | Training | HSE

SPR brings firsthand operational knowledge to every project, understanding the challenges of maintaining safety, productivity and compliance in demanding work environments. Our practical approach bridges the gap between management expectations and frontline operations, delivering solutions that work in the field.

Our experience enables us to work confidently alongside project management, HSE departments, training teams, supervisors and frontline personnel to identify opportunities for improvement and implement practical, sustainable solutions.

SPR's strength lies in understanding the work, the people performing it and the operational environments in which it takes place.

BUILT FOR THE FIELD

Practical HSE, training and consultancy solutions developed with an understanding of real operational challenges, workforce requirements and the demands of Australia's mining and resources industries.

HSE & CONSULTANCY

- On-site and off-site HSE advisory, personnel coverage and project support
- Risk assessments, SWMS, safe work instructions and practical task controls
- WHS systems, policies, procedures and compliance audits
- Incident investigation support, corrective actions and safety leadership
- Contractor management, workforce consultation and shutdown support

WORKFORCE CAPABILITY

Training that supports real operations.

SPR assists clients with operational training, assessment, competency verification and trainer/assessor coverage across resource-sector work environments.

Operational training & coverage

- Load and haul, mobile plant and earthmoving equipment
- Crushing, screening, materials processing and civil earthworks
- Maintenance, construction and shut down - related training support
- Site trainer coverage, mentoring, workforce development and apprenticeship support

TECHNICAL TRAINING & ASSESSMENTS

- High Risk Work Licence training facilitation for approved classes
- RII training and assessment through an appropriately authorised RTO arrangement
- Verification of Competency (VOC) assessments for relevant plant and equipment
- Working at Heights, Confined Space and Gas Testing training facilitation, subject to current scope

TRAINING DELIVERY ARRANGEMENTS

SPR is not a Registered Training Organisation. Nationally recognised training is facilitated through authorised RTO arrangements and is subject to current scope, agreements and trainer approvals. Site-specific VOCs are distinct from accredited training.

RTO Partnerships

SafePath Resolutions Pty Ltd (SPR) maintains established Memorandums of Understanding (MOUs) with Registered Training Organisations, including KITA (RTO# 52593) and Training U (RTO# 52608) to support the facilitation and delivery of nationally recognised training and assessment services.

These partnerships enable SPR to provide clients with access to a range of accredited training solutions, supported by experienced industry trainers and assessors.

Training and assessment services are delivered in accordance with the relevant RTO's approved scope of registration, applicable training and assessment requirements and the terms of the respective partnership arrangements.

SPR also provides workplace-based Verification of Competency (VOC) assessments and site-specific training support to assist clients in maintaining workforce capability and operational compliance.

PARTNER WITH SAFEPATH RESOLUTIONS

Your project |Our commitment.

SPR provides flexible, practical HSE and training assistance tailored to site requirements, project schedules and workforce needs.

Where we add value

- Mining, crushing, screening and processing operations
- Civil construction and mobile equipment activities
- Project mobilisation, campaign and shutdown coverage
- Training systems, competency assessments and workforce support
- Safety documentation, inspections, audits and improvement programs

OUR APPROACH

Understand the work. Identify what matters. Work with the people doing the job. Deliver practical solutions that support safer, more capable workplaces.
