POP, BOOM & REVEAL

SAFETY INSTRUCTIONS

At POP, BOOM & REVEAL, safety is our highest priority. We want every gender reveal celebration to be exciting, memorable and, most importantly, safe.

All customers must read and understand these safety instructions before setting up or operating any hired equipment.

By hiring our equipment, customers agree to follow these instructions, the signed Hire Agreement and all relevant manufacturer guidelines.

1. General Safety Requirements

- Equipment must only be operated by a responsible adult aged 18 or over.
- Children and pets must be kept away from the equipment and operating area.
- Never allow children or guests to operate the cannons, blasters, compressors or controllers.
- Never operate equipment under the influence of alcohol or drugs.
- Always use the equipment in a suitable, open outdoor area.
- Keep the operating area clear of people, animals, vehicles, buildings and other obstacles.
- Never modify, dismantle, tamper with or attempt to repair any equipment.
- Never leave operating equipment unattended.
- Always follow the supplied written instructions and instructional video.

2. Cannon and Blaster Safety

Our gender reveal cannons/blasters use compressed air to release approved coloured reveal powder and/or confetti.

Before operation:

- Inspect the equipment for visible damage.
- Position the cannon securely on a stable and level surface.
- Ensure the launch direction and surrounding area are clear.
- Keep all guests at a safe distance.
- Never point the cannon towards people, animals, buildings, vehicles or property.
- Only use materials approved for the specific equipment.
- Never attempt to open, dismantle or modify a pressurised cannon.
- Never use equipment that appears damaged, faulty or unsafe.

- Always follow the manufacturer's instructions regarding positioning, operating procedures and safe distances.

3. Air Compressor and Pressure Safety

Our equipment uses compressed air, and correct pressure management is essential.

- Use only the supplied or manufacturer-approved compressor, hoses and connections.
- Inspect hoses and fittings before use.
- Ensure all connections are properly secured before operating the compressor.
- Charge the cannons individually according to the supplied instructions.
- Never exceed the maximum operating pressure specified by the manufacturer.
- The specified maximum pressure for the supplied cannon model must be observed. For models rated at 0.8 MPa, this is 8 bar.
- Never bypass, adjust or interfere with automatic pressure cut-off systems or safety valves.
- Never disconnect an air hose or fitting while the system is pressurised.
- Stop immediately if you notice an air leak, unusual noise, damaged fitting or abnormal pressure reading.
- Our cordless compressor is designed to automatically stop when its preset pressure limit is reached. Safety valves are also fitted to the cannons/blasters and compressors. These features provide additional protection but do not replace correct operation.

> **IMPORTANT:** Never attempt to overfill or pressurise equipment beyond its specified limit. Excessive pressure can cause equipment failure, sudden air release, serious injury or property damage.

4. Generator Safety (Outdoor Setups)

Where a generator is supplied with your booking, the following precautions must be followed:

- Always operate the generator outdoors in a well-ventilated area.
- Never operate a generator inside a home, garage, tent, enclosed area or near open windows and doors.
- Keep the generator away from guests, children and pets.
- Place the generator on stable, level ground.
- Keep it away from water, rain and wet surfaces.
- Never refuel a running or hot generator.
- Keep fuel away from flames, sparks and other ignition sources.
- Do not overload the generator.

- Follow the manufacturer's instructions for starting, operating and shutting down the generator.
- Never attempt electrical repairs or modifications.

5. Powder and Confetti Safety

Gender reveal powder and confetti should be handled responsibly.

- Only use materials approved for the specific cannon/blaster.
- Never substitute other powders, chemicals or materials.
- Avoid inhaling airborne powder.
- Avoid direct contact with eyes and mouth.
- Keep powder away from food, drinks and food preparation areas.
- Keep materials away from children and pets.
- Store unused materials in their original packaging and according to the manufacturer's instructions.
- Follow the relevant product safety information and Safety Data Sheet (SDS), where applicable.
- Customers should check the suitability of the powder and confetti for their venue and guests before use.

6. Weather and Outdoor Conditions

Before operating the equipment, assess the surrounding environment.

- Do not operate equipment in unsuitable weather conditions.
- Avoid operation during strong or unpredictable winds.
- Do not operate during thunderstorms or where lightning is present.
- Never operate equipment in wet conditions if the equipment or electrical components could become unsafe.
- Ensure there is sufficient clear space for the launch and dispersal of powder or confetti.
- Check venue requirements and obtain permission before setting up.
- If weather or environmental conditions become unsafe, postpone the launch.

7. TNT Controller and Electrical Safety

If your package includes a TNT controller:

- Only a responsible adult may operate the controller.
- Inspect cables, plugs and connections before use.
- Keep electrical components away from water and wet surfaces.
- Follow the supplied manufacturer instructions for connection and operation.
- Never modify wiring, switches, plugs or electrical connections.
- Keep guests away from the controller and cables.
- Do not use damaged electrical equipment.
- Only connect and operate the controller using the approved setup supplied with your hire.

8. After the Gender Reveal

Once the launch is complete:

- Follow the manufacturer's shutdown and depressurisation procedure.
- Do not immediately touch, move or disconnect pressurised equipment.
- Never disconnect hoses or fittings while under pressure.
- Keep guests away until the equipment has been made safe.
- Allow equipment to cool or settle if required.
- Pack away equipment carefully according to the supplied instructions.
- Return all hired items and accessories as required under your Hire Agreement.
- Never attempt to dismantle or repair equipment yourself.

9. What to Do if Something Goes Wrong

If you notice unusual pressure, air leakage, damaged equipment, electrical problems or any other abnormal behaviour:

- Stop using the equipment immediately.
- Keep everyone away from the equipment.
- Do not attempt to repair, adjust or disconnect pressurised components.
- Follow the manufacturer's emergency and shutdown instructions only if it is safe to do so.
- Contact POP, BOOM & REVEAL for assistance.
- If anyone is injured or there is an immediate danger, contact emergency services on 000.
- Do not continue using equipment until the issue has been properly assessed and resolved.

10. Customer Responsibilities

By hiring equipment from POP, BOOM & REVEAL, customers agree to:

- Read and understand all supplied safety instructions.
- Watch the instructional video before operating the equipment.
- Sign and comply with the Hire Agreement.
- Ensure only responsible adults operate the equipment.
- Follow all manufacturer instructions and pressure limits.
- Maintain a safe operating area throughout the event.
- Take reasonable care of all hired equipment.
- Stop using equipment immediately if it becomes unsafe.
- Return equipment and accessories in accordance with the Hire Agreement.

Customers are responsible for ensuring the venue permits the use of the equipment and that the setup is suitable for their event.

OUR FINAL SAFETY MESSAGE

We want your gender reveal to be a moment you remember for all the right reasons.

Please take the time to understand the equipment, follow every safety instruction and never take unnecessary risks.

If you are unsure about anything, contact us before operating the equipment.

Thank you for choosing POP, BOOM & REVEAL.

POP. BOOM. REVEAL.

Making your special moments unforgettable!

Important Notice: These safety instructions supplement, and do not replace, the manufacturer's operating manuals, equipment-specific instructions or applicable safety requirements. Customers must follow the instructions supplied with their particular hire package.
