RIIWHS204E – Working Safely at Heights Training

This unit is designed for workers that perform tasks at height, such as in construction, maintenance, mining, and other industries. The course aims to provide the participants with the essential skills and knowledge to work safely at heights in accordance with industry standards, workplace health and safety, and Australian standards.

The course is face to face training with a mix of theory content, practical and class participation. Assessment consists of written responses to questions and observation of practical skills.
The training and assessment are conducted on-site at the premises of industry clients providing there are suitable infrastructure and industry training facilities.

What you will learn:

- Legislation and WHS requirements
- Duty of care and Safe work practices
- Hazards and risk management
- Planning your work
- Definitions and types of working at height activities
- Equipment selection, checking and correct use
- Anchor systems (including selecting anchorage points)
- Fall restraint systems
- Fall arrest systems
- Work positioning systems
- Correct use of ladders and ladder training
- Rescue equipment & procedures

Entry requirements:

Participants must have a USI number.
Participants must be able to speak and understand, read and write in English. There is a requirement all assessments **must** be conducted in English.
You MUST wear protective work wear (safety boots or sturdy enclosed footwear, hard hat and gloves) for practical assessment. These need to be supplied by the participant.

Outcome:

Upon successful completion of the course, participants will receive a statement of attainment that is nationally recognised.
