

About

CurlPoint helps small and medium-sized organisations (including Boards and not-for-profits) maximise their Microsoft 365 investment.

We design intuitive SharePoint environments that streamline operations, support governance and reduce reliance on unnecessary software.

While IT providers rightly focus on infrastructure and security, **CurlPoint** fills the gap in strategic design and content management - ensuring the right people have access to the right information at the right time.

***Your success,**
powered by our
lived experience*

"Your expertise in SharePoint was invaluable to our team. I have since implemented many of the strategies you shared with us in my current role, and I can confidently attest to their effectiveness.

I have no doubt that you will continue to deliver exceptional results for all of your future clients."

Umar, 2024

Core Competencies

- **Microsoft 365 Optimisation:** Expertise in leveraging Microsoft 365 tools, including Modern SharePoint, Teams, Lists, Forms, and Planner to suit the modern workplace
- **Information Architecture:** Designing and structuring your M365 online information to ensure seamless access and collaboration
- **Process Improvement:** Streamlining workplace processes to enhance efficiency and productivity
- **User Adoption and Training:** Ensuring your team can quickly adapt to new tools and workflows with minimal viable products and out-of-the-box functionality
- **Business-IT Communication:** Bridging the gap between business objectives and IT capabilities to ensure alignment, efficiency and innovation

Services

- 1. Strategic SharePoint Design:** Tailoring Microsoft Teams and SharePoint environments to align with your operations, ensuring they are structured and designed to meet your specific needs. This includes creating a well-organised information architecture in Microsoft 365 that allows for easy access and efficient data management, enhancing overall productivity in a secure environment.
- 2. Business Process Optimisation:** Analysing and streamlining your processes to make the most of your Microsoft 365 tools, improving efficiency and reducing operational bottlenecks
- 3. User Training and Support:** Providing comprehensive training and support to ensure your team can effectively use Teams, SharePoint, and other Microsoft 365 tools, maximising their potential

Immediate Benefits

-  **Out-of-the-Box Solutions:** Leverage built-in functionality for cost-effective productivity boosting solutions
-  **Future-Proofing for Copilot:** Prepare your architecture and workflows for future Copilot adoption (if not in use already)
-  **Advanced Security:** Benefit from enterprise-grade security features
-  **Expert Change Management:** Our risk-managed, critical thinking approach aligns change initiatives seamlessly with your goals, minimising disruption and maximising adoption
