

WHAT'S INVOLVED IN ROOF RESTORATION?

Step 1: Installation Of Safety Equipment

Where necessary, temporary edge protection or safety harnesses are used to ensure work can be done safely

Step 2: Roof Cleaning

The roof, using 4000psi high pressure water blasters, is cleaned, with water runoff redirected away from stormwater drains.

Step 3: Roof Repairs

Any necessary roof repairs like ridge cap repointing or valley replacement are carried out to make sure the roof is ready for priming and painting

Step 4: Primer & Sealer

The whole roof area is sealed to ensure good adhesion with the Roof Membrane coating. Various specialized primers are available, designed to work together in a system to match particular conditions and materials.

Step 5: Roof Protect Membrane

Two coats of Roof Protect roof membrane are applied in a colour of your choice

SUPERIOR PROTECTION PLATINUM 20yr WARRANTY

The Roof Protect roof restoration system is backed by the longest product warranty in Australia, employing our three-coat process. With this system, we provide an exceptional 20-year warranty that assures durability, film integrity, and protection against peeling or cracking

- 1 x coat of Roof Protect Platinum Primer / Sealer
- 2 x coats of Roof Protect 20-Year Membrane

STANDARD 15yr WARRANTY

Our Standard Roof Protect system is accompanied by a solid 15-year warranty, ensuring reliable performance and durability. This system is specially designed to offer superior protection, maintaining the structural integrity of your roof while guarding against issues like peeling and cracking for a 15 years.

- 1 x coat of Roof Protect Primer / Sealer
- 2 x coats of Roof Protect 15-Year Membrane

Total Solar Reflectance (TSR) refers to the method of measuring a surface coating's reflective capability. The TSR test results presented are derived from controlled laboratory conditions and are provided for comparative purposes only. Actual performance may vary based on environmental factors, application methods, and on-site conditions. Colours marked with  can be ordered in HRC (Thermal Heat Reflective Coating) . HRC coatings increase the TSR to make darker colours cooler than their standard equivalent. Colours marked with  are the limited range for 20 year Warranties on Metal Roofs. Colours shown are as close as possible to actual colours and finishes can vary depending on the application. Due to limitations of your display screen and the printing process, photographic and printed images may not represent the true colour. Refer to actual samples for exact colour and finish.
