

Transform Your SharePoint Into A Business Asset

We help organisations work better with the Microsoft 365 tools they already have

CurlPoint supports small and medium sized organisations - including boards and not-for-profits - to get real value from Microsoft 365.

We design intuitive SharePoint and Microsoft Teams environments that streamline operations, support governance and reduce reliance on unnecessary software.

Where IT providers focus on infrastructure and security, **CurlPoint** fills the gap in strategic design and content management - ensuring the right people have access to the right information at the right time.

Independent, vendor-neutral advice

CurlPoint is not a managed service provider and does not re-sell software.

All recommendations are focused solely on what will work best for your organisation using Microsoft 365

"Your expertise in SharePoint was invaluable to our team. I have since implemented many of the strategies you shared with us and can confidently attest to their effectiveness.

Umar, Asset Planner (2024)

Core capabilities that improve clarity, adoption and efficiency

- We optimise Microsoft 365 for how your organisation actually works: Deep expertise across modern SharePoint, Microsoft Teams, Lists, Forms and Planner - applied practically, without over-engineering
- We design information architecture that people can navigate with confidence: Clear, logical structuring of online information to support access, collaboration and sound decision-making
- We streamline processes using out-of-the-box functionality: Efficient, sustainable improvements that boost productivity without fragile custom solutions
- We support adoption through practical training and mentoring: Helping teams adapt quickly to new tools and workflows with confidence and minimal disruption
- We translate between business needs and IT capability: Bridging the gap so technology decisions genuinely support organisational goals

Transform Your SharePoint Into A Business Asset

Practical services designed for real workplaces

- 1. SharePoint and Microsoft Teams design:**
Tailored environments aligned to your operations - structured, secure and built to scale
- 2. Business process optimisation:**
Analysing and improving workflows using Microsoft 365 to reduce friction and bottlenecks
- 3. User training and support:**
Targeted training and advice so your team can confidently manage and enhance your environment over time

Founded on lived experience, not theory

CurlPoint is led by Stacey Smith, bringing decades of experience across administration, management and leadership roles.

This operational background shapes a practical, people-first approach to SharePoint - balancing best practice with the realities organisations face every day.

Immediate benefits without extra complexity

-  **Out-of-the-box solutions:** Leverage built-in functionality for cost-effective productivity boosting solutions
-  **A strong foundation for Copilot readiness:** Prepare your architecture and workflows for future Copilot use
-  **Enterprise-grade security by design:** Working within Microsoft's security framework from the outset
-  **Change that's carefully managed and widely adopted:** A considered, risk-aware approach that minimises disruption and improves take-up

Let's Talk

If SharePoint feels harder than it should, a short conversation can quickly clarify where to focus
