RIIHAN309F – Conduct Telescopic Materials Handler Operations

This unit specifies the skills and knowledge required to conduct telescopic materials handler operations safely. A multi tool carrier (also known as a variable reach truck, multi-purpose tool carrier or telehandler) can be fitted with a range of attachments. Telehandlers are very versatile machines that can be used for lifting and carrying materials. They come in a variety of sizes with different capabilities for lifting, carrying, scooping and stacking. No licence is required by legislation, If the multi tool carrier is non-slewing and fitted with a jib or used as a crane with a rated capacity of 3t or less. Also if the machine is fitted with forks or other attachments.

Our course is a mix of theory content, practical and class participation. Assessment consists of written responses to questions and observation of practical skills.

What you will learn:

- Legislation and WHS requirements
- Duty of care and Safe work practices
- Hazards and risk management
- Planning your work
- Conduct routine checks on a telehandler
- Shift loads in a safe manner
- Safely shut down and secure equipment

Entry requirements: Participants must have a USI number.
Participants must be from 18 years of age.
Participants must be able to speak and understand, read and write in English. There is a requirement all assessments **must** be conducted in English.

You MUST wear protective work wear (safety boots or sturdy enclosed footwear) for practical assessment. These need to be supplied by the participant.

Outcome:
A statement of attainment for RIIHAN309F Conduct Telescopic Materials Handler Operations.
